This is a multi-site certificate, additional site(s) are listed on the next page(s)

Bureau Veritas Certification Holding SAS – UK Branch certifies that the Management System of the above organisation has been audited and found to be in accordance with the requirements of the management system standards detailed below

ISO 45001:2018

Scope of certification

Design, manufacturing and testing of high pressure gas containers made of metal (seamless cylinders) materials, reinforced metal materials (seamless liners) with composite materials or completely made of composite materials. The main manufacturing phases are: manufacture of semi-finished shells for the production cylinders or liners for the production of reinforced metal containers with composite materials: cutting, phosphatizing, cold deep drawing, annealing, backwards extrusion, shot-blasting, bottom hot spinning, internal bottom boring. These phases are followed by the following processes: neck hot spinning, heat treatment, mechanical neck machining, shot-blasting, hydraulic testing, painting, inspection and testing. Operations for the production of high pressure tanks made of metal materials reinforced with composite materials or tanks made of composite materials only such as: winding, curing, hydraulic and autofrettage testing, painting and sealing. Material test laboratory; tests on finished products, specific tests for hydrogen tanks. Tools construction and maintenance departments. Main warehouse.
